Profile

I am a recent Bachelor of Computer Applications (BCA) graduate and a motivated Software Developer with a strong passion for building modern, reliable, and scalable applications. I have hands-on experience with Python, JavaScript, React, Flutter, Django, FastAPI, PostgreSQL, MongoDB, HTML, CSS, Git, and SQL, along with developing full-stack web and mobile applications. I am skilled in backend development, frontend development, database design, RESTful APIs, and creating responsive user interfaces. I enjoy learning new technologies, solving real-world problems, and continuously improving my technical skills. As a passionate fresher, I am seeking an opportunity to contribute to impactful projects, gain practical industry experience, and grow as a Software Developer while delivering high-quality software solutions.

Skills

 Python 

 Javascript 

 Flutter 

 React 

 Github 

 Django 

Education

Uniglobe SS/College
2019-2021

Completed Higher Secondary Education (+2) in Computer Science with a **3.22 GPA**, establishing a solid foundation in programming concepts and computer science fundamentals.

School of Environment
Science and management
2021 - 2026
